PATIENT DISCLOSURE & WAIVER FORM
Waiver: **LINED TO NO LINE WAIVER** | Date: 6/11/2026
Patient Name: _____

LINED TO NO LINE WAIVER: I have been cautioned by my optician that switching from a lined bifocal to a no-line bifocal or progressive is very difficult to adjust to if you can at all. With a no-line you have a diminished field of view where as with the lined bi-focal you have the entire lens. I understand Pal Optical will not remake my lens to a no-line if I dont line the field of view in the progressive/no- line bifocal.
